Foreign Services

Q: Has your Big Bank Foreign Services Partner lost interest in your business?

A: Community Bankers' Bank ("CBB") offers full Foreign Services capabilities that are customer oriented and community bank friendly. As your partner, CBB enables your bank to maintain and expand customer relationships instead of directing customers to larger institutions for international services.

CBB offers a complete array of funds transfer and foreign currency services to you and your customers. Using CBLink, CBB's proprietary online communication system, CBB provides our client banks a safe and efficient means for their customers to send funds globally and to complete various international transactions. Client banks are able to initiate international wires, order international bank drafts, and order or sell foreign currency.

Working through CBB, your bank can solve that unique foreign payment or collection issue that your customer may have. Our foreign services partner, Travelex, is the world's largest foreign exchange specialist and non-bank provider of international payments.

Services and Benefits
